

■ 10 Days Ethers.js Master Plan (Beginner → Pro)

Daily practice time: 1–1.5 hour max

DAY 1 — Provider

- RPC kya hota hai
- Provider kya hota hai
- Hardhat provider + public RPC

Practice: `getBlockNumber()`, `getBalance()`, `formatEther()`, `getGasPrice()`

DAY 2 — Signer

- Private key se signer
- Signer ke transactions
- `getSigners()`, `signMessage()`, `sendTransaction()`

DAY 3 — Contract Deploy

- `deploy.js` banana
- `ContractFactory` use karna
- Deployment address print karna

DAY 4 — Contract Read

- `getContractAt()`
- ABI concept
- View functions read

DAY 5 — Contract Write

- State■change functions
- `tx.wait()`
- Gas understanding

DAY 6 — Mapping + Struct

- Mapping read/write
- Struct handling
- Prompt  sync se input

DAY 7 — Events

- contract.on()
- queryFilter()
- Past + live events

DAY 8 — Utils + Hashing

- parseEther(), keccak256()
- toUtf8Bytes(), randomBytes()

DAY 9 — Raw RPC

- provider.send()
- eth_getBalance, eth_blockNumber

DAY 10 — Full DApp

- MetaMask connect
- Browser signer
- Read/Write UI
